FOR IMMEDIATE RELEASE: July 18, 2012

Boulder Neurosurgical & Spine Associates Named One of 55 Spine Surgery Practices to Know by Becker’s Spine Review

(BOULDER, Colo.)— Wednesday, July 18, 2012 –Boulder Neurosurgical & Spine Associates (BNA) of Northern Colorado has been named one of 55 Spine Surgery Practices to know by Becker’s Spine Review. Members of the list were selected based on their status as a spine-focused or spine-driven practice, affiliation with professional organizations, leaders within the group and diversity of services provided at the practice. Practices do not pay and cannot pay for inclusion on this list.

This list was created as a result of extensive research and recommendations solicited from Becker’s readership. Many of the groups appearing on the list include several specialists who are focused on advancing the forefront of spinal care. The groups often include operative and non-operative neurosurgeons, orthopedic spine surgeons and spine specialists. In addition to their clinical practice, many of the surgeons also participate in cutting-edge research and spinal patient advocacy efforts at the local and national level. Others travel worldwide to provide spine care to underserved populations.

“BNA is proud to be recognized as one of Becker’s 55 spine surgery practices to know. Our practice not only includes fellowship trained and board certified neurosurgeons, but each brings their own area of specialty, from spinal deformity, to neurovascular oncology and functional neurosurgery, says Dr. Alan Villavicencio. “We are dedicated to challenging and advancing the field through research made possible largely because of our nonprofit organization, the Justin Parker Neurological Institute.”

Boulder Neurosurgical and Spine Associates (BNA) is a comprehensive neurosurgical practice located in Boulder, CO, with multiple satellite locations located throughout Northern Colorado. BNA has been in practice for more than 10 years, with surgeons who have received the highest ratings in the Denver Metro area. BNA is one of the few practices in the country with expertise in both orthopedic and neurosurgical spine care. BNA has been extensively published on orthopedic and neurosurgical and spine care and BNA surgeons have presented at hundreds of national and international meetings on the most up-to-date surgical and non-surgical techniques. BNA surgeons founded the Justin Parker Neurological Institute (JPNI), a fully accredited nonprofit organization whose principle purpose is to conduct clinical research, advance knowledge and practice medicine through innovations in clinical technology, while providing evidence-based clinical guidelines and education to health care professionals. For more information visit www.bnasurg.com and BNA Facebook and BNA Twitter.

Becker’s Spine Review is a Chicago-based publication focusing on spine surgery, orthopedic surgery and pain practice management. The primary contributors and target audience for this publication are spine surgeons and industry experts.
